Sorted Wallet (Play Store)

Summary

React Native engineer with 4+ years of experience architecting and shipping production mobile apps across fintech, healthtech, and social verticals. Currently at Blinker Technology (Hong Kong), leading the full mobile stack for Sorted Wallet, a non-custodial, Tether-backed stablecoin wallet for emerging markets. Strong track record of full mobile ownership spanning architecture, feature delivery, security engineering, and release management.

Experience

Software Developer, React Native – Mobile Architect *Oct 2024 – Present*
Blinker Technology Limited, Hong Kong (Remote)

- Led the full mobile stack for Sorted Wallet, a non-custodial, Tether-backed stablecoin wallet for emerging markets, backed by $4.4M in seed funding led by Tether and Gnosis and surpassing 1,000,000 downloads across 160 countries including Nigeria, Kenya, Tanzania, and Bangladesh.
- Served as primary developer, building and owning the core of the app including onboarding, authentication, wallets, transactions, contacts, market, swap, earn, send cash, add cash, remittances, lite/pro mode, navigation, and settings.
- Built QR-based send/receive flows with multi-language support for users across emerging markets.
- Integrated fiat-to-crypto on-ramps and cash-out flows for cross-border add-cash and remittances, with encrypted on-device storage (MMKV), reCAPTCHA, and device-fingerprint binding for account security.
- Architected the React Native frontend for performance and maintainability, set up the release and CI pipeline with lint, test, and format gates before every build.
- Wired in push notifications (Firebase, Notifee) and analytics/attribution (Mixpanel, Adjust) to measure funnels from day one.

MERN Stack Mentor *Mar 2023 – Oct 2024*
Codefeast, India

- Delivered 600+ hours of live sessions mentoring learners on full-stack development (MongoDB, Express, React, Node.js) across career switchers, working professionals, and fresh graduates.
- Guided learners through React.js, REST API design, and production-grade engineering practices.

React Native Developer *Apr 2024 – Aug 2024*
Codefeast, India

- Developed core screens and feature modules for a US-market health application serving clinicians and patients.
- Authored comprehensive unit and integration test suites, improving code reliability and reducing regression risk across all modules.

React Native Developer *May 2023 – Aug 2023*
Codefeast, India

- Built a TypeScript-based social health app for a diabetes community targeting Canadian and US markets.
- Translated Figma designs into responsive React Native components and shipped core social interaction features including feeds, likes, and comments.

Skills

Mobile: React Native, TypeScript, Redux, Redux Thunk, React Navigation, Reanimated, Mapbox, MMKV, Notifee
Services: Firebase, Mixpanel, Adjust, Stripe, reCAPTCHA
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
DevOps and Tools: Fastlane, Xcode, Android Studio, App Store Connect, Google Play Console, Git, RevoPush, n8n, Cursor IDE
Platforms: iOS, Android (including AOSP and Android Go)

Education

Bachelor of Technology, Computer Science Graphic Era Hill University, Dehradun

Certifications

React Native: The Practical Guide [2023] · React: The Complete Guide (Hooks, Router, Redux) · NodeJS: The Complete Guide (MVC, REST, GraphQL)
